## Work Experience

### Content Creator – Binary Labs

At Binary Labs, I led the creation of compelling content that blended technical accuracy with engaging storytelling. Working closely with UI/UX designers, developers, and marketers, I crafted strategic digital assets from promotional campaigns and video scripts to microcopy and educational content that elevated brand presence and user engagement. My role extended beyond just writing; I shaped the tone of voice for products, refined communication flows, and ideated content.

## Education History

### Bachelor of Computer Engineering :

Kathford International College of Engineering and Management, Tribhuvan University

### 10+2:

Liverpool International College  
National Examination Board

### SEE:

Bhanubhakta Memorial Higher  
Secondary School  
National Examination Board

---

## Relevant Skills

- Basic coding knowledge with UI/UX focus
- Familiar with emerging technologies and content creation tools
- Strong problem-solving mindset
- Highly adaptable and flexible
- Detail-oriented
- Excellent verbal and written communication
- Self-motivated and energetic
- Quick decision-making and critical thinking
- Patient and tolerant
- Comfortable in diverse situations and roles

## Projects

### Major Project – Personality Prediction System from CV Analysis using Machine Learning

Designed and developed a smart application that predicts personality traits by analyzing CV/resume content using machine learning techniques. This system aimed to assist HR professionals in shortlisting candidates by providing psychological insights based on text analysis.

### Minor Project – Property Renting Platform using Blockchain Technology

Collaborated in a team of three to develop a decentralized platform for property rentals using blockchain.
